The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 12, 24, & 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Fredrickson 4,077,385.

Fredrickson shows a bow having a handle; first lower limb 22; second upper limb 22 (figure 1); a lower cam element 28 "operably associated" with the lower limb; a pair of idler wheels 40, 50 operably associated with the upper limb; and a bowstring 58 operably associated with the cam and wheels so that as the bowstring is pulled, the cam will pivot, and the wheels will pivot at different rates.

Claims 1-5 are allowed.

Claims 7-11, 13-23, & 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art does not disclose an archery bow including a handle; a first limb having a proximal end

connected to the handle, and a distal end carrying an eccentric cam; a second limb having a proximal end connected to the handle, and a distal end carrying multiple idler wheels, mounted for independent pivoting; and a bowstring mounted to pivot the cam element, and the wheels at different rates of angular displacement.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
